DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group A, Fig. 2b with subgroup I in the reply filed on May 23, 2005 is acknowledged.

2. Claims 9-12, and 15-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on May 23, 2005.

Claim Objections

3. Claim 1 is objected to because of the following informalities: line 4, "an second" should be changed to --a second--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 18 recites the limitation "the sensed vibratory response" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Application/Control Number: 10/676,775 Page 3

Art Unit: 3682

7. Claims 1-9, 13, and 18 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The specification sets forth the planet gear 36 is allowed to rotate fully inside ring gear 32, however mass 42 inhibits the planet gear 36 from making a full rotation inside ring gear 32, because the crank 38 will interfere with the mass 42 (see Fig. 2B). Thus, the device is inoperable and lacks utility.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 1-7 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Tripp (USPN 2,688,896).

Tripp discloses a first circular member 404 defined about a first axis to define a first inner diameter, a second circular member 425, the second radius is one-half the first radius (see column 18, lines 20-25); and a mass 413 located at a circumference of said second circular member;

the first circular member is a ring gear;

the second circular member is a planet gear;

a crank 424 which mounts said second circular member;

motor 230 which drives said crank.

Application/Control Number: 10/676,775 Page 4

Art Unit: 3682

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

11. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tripp in view of Fernandez (USPN 5,833,567).

Tripp discloses all of the instantly claimed invention except an opposed circular counter member mounted to said crank.

Fernandez shows an opposed circular counter member mounted to a crank (see Fig. 3).

To modify the apparatus of Tripp so as to provide an opposed circular counter member would have been obvious to one of ordinary skill in the art at the time the invention was made in view of the teachings of Fernandez that such an arrangement improves the smoothness of operation (see abstract).

12. Claim18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tripp in view of Vincent (USPN 5,853,144).

Tripp discloses all of the instantly claimed invention except transmitting the vibratory force to a helicopter fuselage to minimize the sensed vibratory response to forces from a main rotor assembly.

Vincent shows transmitting a vibratory force to a helicopter fuselage to minimize a sensed vibratory response to forces from a main rotor assembly.

Art Unit: 3682

To modify the apparatus of Tripp so as to apply the vibration force to a helicopter fuselage would have been obvious to one of ordinary skill in the art at the time the invention was made in view of the teachings of Vincent that such an arrangement improves the reduction of the overall level of vibration in the fuselage structure.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley J. Van Pelt whose telephone number is (571)272-7113. The examiner can normally be reached on M-F 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Bucci can be reached on (571)272-7099. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
